#### NOTES

- 1. Valve must be installed on supply line to regulate flow.
- 2. Shut off valve must be installed on drain line.
- 3. Concrete mounting surface for structure installation needs to be level and flat.
- Supply line is based on the designated flow rates for structure.
- 5. Underground plumbing to be designed for winterization.
- 6. Consult local electrical inspector for grounding.
- 7. Concrete will need to be cured a minimum of 7 days before installing structure.
- 8. Product may require a strainer on the water feed line. consult with manufacturer.
- 9. Product specifications are subject to change.

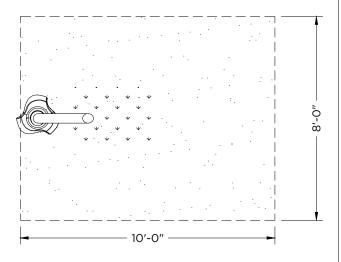

## FRONT VIEW

#### SPLASH ZONE

## Splash Zone-Not to Scale

#### Splash Zone Notes:

Splash zones are approximate, actual splash may vary based on various environmental conditions, flow rates, slope of splash pad, submergence depth and wind.

## Structure:

Stainless Steel Fabrication (see specification for details)

Skirt

Fiberglass Fabrication (see specification for details)

Collar

Urethane Fabrication (see specification for details)

High Flow: 20 GPM
Medium Flow: 10 GPM
Low Flow: 5 GPM
Pressure: 6 PSI

Supply Line: 1" to  $1\frac{1}{2}$ " Pipe

Installation: Flange Mount to Concrete
