

Domestic System Powered by HydroLogix®

The patented HydroLogix® System is a non-electrical water delivery system you can use to power many of your favorite splash pad designs. This entire system is fabricated from durable stainless steel materials that are vandal and corrosion resistant. Ideal water pressure is 30 to 40 psi which will deliver 60 gallons per minute to aqua play features and ground sprays. Get creative with your design and use two HydroLogix Systems side by side!

1. **Activation bollard**
Touch-post activator
 2. **Ground spray**
Flush spray feature with nozzle effects
 3. **HydroLogix hub**
Provides drainage for splash pad and distribution manifold with manual valves for supply lines
 4. **Aqua play features**
Above-grade spray feature with various water activities
 5. **Drain-line to waste**
Carries 4" wastewater to sanitary or storm system
 6. **Main water supply**
Municipal 2" water supply with pressure regulator (30 to 40 psi) and back-flow preventer
- On/Off timer**
Battery operated 2" solenoid valve with programmable time clock to set hours of operation. Can be located above ground at backflow preventer or below ground in irrigation valve box.
